

CometChat Internship Task — UI Kit Review Report This report summarizes findings based on the provided screenshots and experience running the CometChat React UI Kit.

- 1. Dashboard Review** - The dashboard appears clean and straightforward; however, some sections such as navigation to UI Kit Builder could be more visually highlighted for first-time users.
- 2. UI Kit Builder Review** - Theme selection and customization panel provide good flexibility.
- 3. Documentation Review** - Documentation linked from the dashboard is helpful but sometimes too lengthy.
- 4. Actual UI Kit Implementation** - The React UI Kit runs successfully after resolving node-module conflicts.

- The app creation flow works smoothly, but more explanation about region selection and app credentials could benefit beginners.

- Overall, UI looks modern but lacks onboarding hints.

- The preview frame loads correctly but could provide tooltips for icons.

- Downloading the UI kit is simple, but no direct instructions about next steps (like installation commands) are shown.

- Some steps do not match the folder structure from the generated UI kit.

- Missing a troubleshooting section for common installation issues like dependency warnings or peer conflicts.

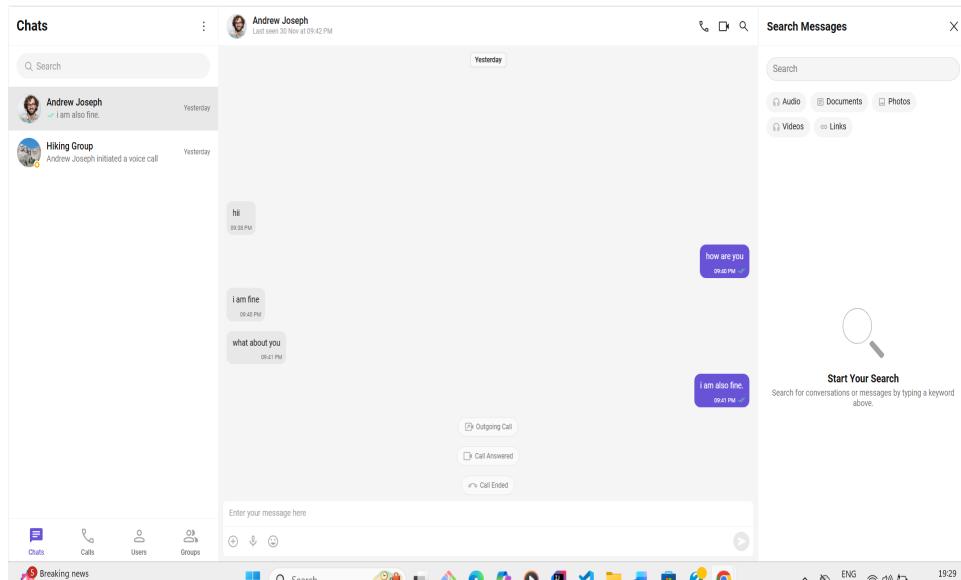

- Screenshots in documentation could better match the current UI.

- The left panel for conversations and the main chat window match expected design.

- Some delays in loading components were observed on first run.

- A few parts of UI feel unintuitive for new developers (example: where to handle login/logout).

- Overall, UI works smoothly once launched, but project setup requires better guidance. Screenshots attached below for clarity.

The screenshot displays a communication application interface with two main sections: 'Calls' and 'Users'.
Calls Section:
- **Header:** 'Calls'
- **List:** A single entry for 'Andrew Joseph' with a timestamp '30 Nov, 09:41 PM'.
- **Central Area:** A large placeholder area featuring a phone receiver icon and the text 'It's nice to talk with someone'. Below it, smaller text reads 'Pick a user or group from the left sidebar call list, and start your conversation.'
- **Bottom Navigation:** Icons for Chats, Calls, Users, and Groups.
- **Taskbar:** Shows a 'Breaking news' notification for 'Samantha Ruth...' and a system tray with icons for battery, signal, and date/time '19:30'.
Users Section:
- **Header:** 'Users'
- **Search Bar:** 'Q Search'
- **List:** A list of users starting with 'A' (Andrew Joseph), 'G' (George Alan), 'N' (Nancy Grace), and 'S' (Susan Marie).
- **Central Area:** A placeholder area featuring a speech bubble icon and the text 'Welcome to your Conversations'. Below it, smaller text reads 'Select a chat from the list to start exploring your messages or begin a new conversation.'
- **Bottom Navigation:** Icons for Chats, Calls, Users, and Groups.
- **Taskbar:** Shows a 'Breaking news' notification for 'Samantha Ruth...' and a system tray with icons for battery, signal, and date/time '01-12-2025'.
